Subject: XtendiMax Supplemental Labels

Hi Steven,

I hope you are doing well!

We have reviewed the labels for Minnesota and Iowa and have some comments (PDFs attached).

It has been decided that the best way to get this information out to the user is to have each registrant set up a website that will hold supplemental labels and add a general direction to the master label that says, "You must check [X website] for state specific restrictions within 30 days of application of this product." That way, if there are changes to these supplemental labels, or if other states want to add supplemental labels, the master label won't need to be updated every time. Additionally, we'll need a supplemental label with this direction since some of the product is already in the hands of the users and can't be relabeled with this direction. You can submit both of those as a fast track label amendment.

Most of the comments have to do with these needing to be supplemental labels rather than bulletins, but if you have any questions about our comments or anything else, please feel free to reach out.

Best regards,
Emily
